

WHAT IS GF-6?

New oil standard moving forward focused against reducing engine wear, LSPI & improving fuel economy

- + Helps reduce engine wear: For example, there is a new timing chain wear test
- + Added protection against LSPI (Low Speed Pre-Ignition)
 - + Tendency of newer, small-displacement, turbocharged direct fuel injected engines to pre ignite at lower RPMs
- + Increase fuel economy to meet higher CAFE requirements

New API License is SP/ILSAC GF-6 which is backwards compatible with API SN Plus/GF-5, SN, etc.

- + Initial date in market is May 1

Royal Purple High Performance Motor Oils have already met API SP/GF-6 standards for over a year

- + Royal Purple has/always will exceed the toughest industry standards
